Oxygen Monitoring Contract

Your O2 monitoring system is one of the most important parts of your system, it protects users from the invisible threats of an oxygen deficient or oxygen enriched atmospheres. The sensors used for this system require changing every two years, and the battery backup every year to keep your users as safe as possible.

What does it cover?

- Testing of system to make sure the correct actions are made by the system at the correct oxygen levels
- Replace any battery backups on site every year.
- Replace any oxygen sensors every other year on site.
- Repair anything that is considered dangerous (at an additional cost)
- Provide a written service report for the system together with a priced proposal for any remedial work required.

- On-site technical support will be provided within 3 working days.
- Telephone support from 08.30 to 17.00 Monday to Thursday, 08:30 to 16:00 on Fridays.

Notes:
The equipment needs to be in use for the inspection to be carried out.
